To whom it may concern:

Grande Disposal Inc. started installing the Multi-Seal tire sealant full fleet on October 1, 2005. This has reduced our overall tire expense including maintenance, new tires, and retreads by well over 60%!

Our casing life has increased from an average 120 day casing life to upwards of 210 days or almost 50% increase. Our daily yards checks are now a bi-monthly event! The most compelling statement is our downtime related to tire failure is almost non-existent.

As a fleet owner operator Multi-Seal has taken my number (2) overhead expense and put it at the bottom of the balance sheet.

Thanks for a great product that does everything it says it does and then some!

Do not hesitate to use me as a reference.

Best Regards,

Terry Gawlik
President
